**Figure 4** PDZIP facilitate the surface expression of human T1R2.

- A. Immunofluorescence staining of Myc-tagged hT1R2 indicates that PDZIP significantly increases the amount of human T1R2 protein on the plasma membrane (Staszewski, May 15<sup>th</sup>, 2001, Notebook No. 2, page 76-77).
- B. FACS analysis data demonstrating the same result (Staszewski, June 4<sup>th</sup>, 2001, Notebook No. 2, page 79). Myc-tagged human T1R2: Green line. Myc-tagged humanT1R2 with PDZIP: black line.
